

## ***Workers Needed!***

### ***Las Brisas Farm Gardening Opportunities***

*Las Brisas Farm is a work in progress and is working toward becoming a sustainable, organic farm. When owners, Eldon and Kathy, started developing the land it was pastureland with a beautiful view of the gentle, rolling countryside. They like to think of their project as starting with a blank canvass to create a collage of outdoor spaces to gather featuring gardens, flowers, fruit trees and vegetables.*

*There are hundreds of roses, mostly Earth-kind and antique, varieties of pomegranates, olives, grapes, and gardens that need tender, loving care in a variety of ways.*

*Las Brisas Farm invites you to spend some time helping us care for our plants and gardens. You don't have to stay a whole day; anytime you can give will be greatly appreciated. So, grab your gardening tools and join us for a day of fun and gain a sense of accomplishment, knowing you helped Nature be all it can be!*

#### ***Calendar:***

***Caring for gardens and flowerbeds-----All year***
